

Nominee: Nina Palomba

Board Position: AACO Secretary

It is my daily duty and honor to the community of Northern Colorado to rehabilitate vision in children, alleviate diplopia in adults, and help teenagers regain their confidence with straight eyes. It is also my duty and goal to grow personally and professionally in the field of orthoptics. I believe it is essential for the newly certified orthoptists to become active leaders in our organization alongside the many orthoptists who I have looked up to since training began. The position of secretary for me will begin to pave the way for the younger generation of orthoptists to become leaders in our field today and allow us to pass on the knowledge, wisdom, and success of our field to the next generation. I embrace the new challenges thus far in my career: academia to private practice, relocating across country, the first orthoptist of a practice, and creating/implementing/coordinating a tech training program. It would be my honor to serve the American Association of Certified Orthoptists as your next secretary. Not to mention, I have a mean words per minute typing speed.
