

Terra Haller

Thank you for considering me as one of your AACO representatives to the AOC. I feel honored to be asked to represent our association. Immediately following my training at the University of Michigan I switched roles and became an educator and loved every minute of it. Since switching paths and going into private practice with Children's Eye Care I have had less involvement in the teaching world and realize how much I miss it. I truly enjoy being an educator and am very passionate about teaching others about this crazy world of pediatric ophthalmology we all live in. I would be thrilled to have any part in the process of bringing up new orthoptists in our field. I truly feel it is important to maintain high standards and consistency to ensure only the most qualified individuals join our profession.
